La Cosmovisión Andina
Callejón de Huaylas, Peru

The Cosmovisión Andina represents a familial relationship between Hombre (Man), Dios (God), and Nature, and it is essential in understanding Andean culture. It is the lens through which Andeans see their world and their lives, how everything is connected and flows from one thing to another, and how this view will continue to flow through time.

In the Callejón de Huaylas, and all of Peru have endured terrible events at the hands of man and nature, whether it be natural disasters or the disaster of having local resources destroyed and pillaged. Yet they all still together in the Cosmovisión Andina. The Cosmovisión is a template for all human beings to appreciate, a viewpoint from which everyone can learn. In the midst of our battle with global warming and other modern calamities, this vision represents a way for all beings to peacefully inhabit the Earth as a larger model of a loving family.

In June 2008, I spent three weeks at a Jones’s ranch in Huancachac and Bebing field school at a retreat in a small house called Callejón in the Precos mountain. There I proposed the Cosmovisión research in the Andes program to the field school participants. I explained the research to them, which is a comparison of the Cosmovisión model with Western model. From the Wyoming residents, we can learn to have new research questions and answer them. The research is about the evolution of exchange system and the Andean exchange system.

The Andean worldview is a worldview that has been accepted by the people of the Callejón de Huaylas. It is a worldview that has been accepted by the people of the Callejón de Huaylas, and it is a worldview that has been accepted by the people of the Callejón de Huaylas. It is a worldview that has been accepted by the people of the Callejón de Huaylas. It is a worldview that has been accepted by the people of the Callejón de Huaylas. It is a worldview that has been accepted by the people of the Callejón de Huaylas.

There exist many balances within the Andean understanding of the universe. There are dichotomies in balance and support the entire Andean Cosmovisión. It is therefore possible to think of the universe as a sort of balance or relationship between all members of the universe. Andean Cosmovisión is a way of thinking about the world that goes at least as far back as the Incans. These rulers believed they were children of the sun god, Inti.

There is a belief in Peru that the Milky Way moves in a circle throughout the twenty-night. They believe that the Milky Way moves in a circle throughout the twenty-night.
